

The background of the slide is a detailed architectural floor plan of a healthcare facility, rendered in white lines on a dark grey background. The plan shows various rooms including patient rooms, a central hallway, a reception area, and a parking lot with several cars. A 'P' symbol is visible in the parking area on the left side. The overall layout is complex and organized, typical of a hospital or medical center.

Places to be Monitored

Registration

Monitoring Objective

Recognize faces and see actions between counter and patients

Hardware Requirement

- Many people walking around → need to avoid motion blur
- Want so see human faces → need good video quality

ACM-5811

- CCD sensor, less motion blur
- Changeable lens adapt to different size of counter
- 540 TVL for clear image and video quality

Download

Software Requirement

- Full time recording during office hour
- Motion recording after office hour

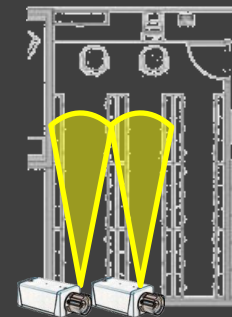

NVR

- Live View
- Recording / Playback
- Event Management

Download

Pharmacy

Monitoring Objective

- Monitor the process of medicine handling
- Theft prevention

Hardware Requirement

- Constant movement from medicine handling process → need to avoid motion blur

ACM-5811

- CCD sensor, less motion blur
- Changeable lens adapt to different size of counter
- 540 TVL for clear image and video quality

Download

Software Requirement

- 24 hours recording

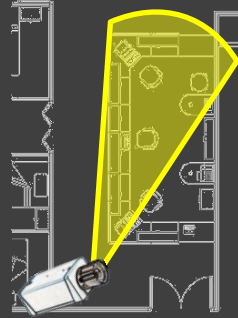

NVR

- Live View
- Recording / Playback
- Event Management

Download

Nursing Station

Monitoring Objective

- Recognize faces
- Any unattended objects, ex. Bags
- Nursing station's goods being stolen

Hardware Requirement

- Many people walking around → need to avoid motion blur
- Want so see human faces → need good video quality

ACM-1511

- Megapixel resolution for better details
- 3.3~12mm Vari-focal lens
- IR LED build-in for clear image even at low light environment

Download

Software Requirement

- 24h recording
- Alert if there're unattended objects
- Alert if nursing station's goods being stolen

NVR

- Live view / Recording

Download

IVS

- Facial Recognition to identify faces
